

MD TARIQUZZAMAN

ORACLE INFRASTRUCTURE AND ENGINEERED SYSTEMS LEAD ENGINEER

Oracle Exadata | Private Cloud Appliance | SPARC and LDOM | Enterprise Infrastructure | AWS Cloud

Dhaka, Bangladesh | +8801774483530 | mdtariquzzamantanib@gmail.com

LinkedIn: <https://www.linkedin.com/in/mdtariquzzamantanib>

EXECUTIVE SUMMARY

Oracle Technical Lead and Enterprise Infrastructure Specialist with 15+ years of progressive experience in infrastructure solution design, architecture planning, implementation, migration, high availability, virtualization, troubleshooting, and enterprise project delivery. Possesses strong hands-on expertise in designing and implementing mission-critical Oracle infrastructure solutions for complex enterprise environments, including Banking, Telecommunications, Government, and other large-scale organizations.

Highly experienced in Oracle Engineered Systems and enterprise infrastructure technologies, including Oracle Exadata Database Machine, Oracle Private Cloud Appliance (PCA), Oracle Database Appliance (ODA), Oracle SPARC and x86/Intel Server platforms, Oracle Solaris Operating System, Oracle Linux Operating System, Oracle Solaris HA Cluster, Oracle Linux application HA clustering, Oracle LDOM virtualization, Oracle Linux KVM virtualization, Oracle ZFS Storage Appliance, and Oracle StorageTek SL-Series Tape Library solutions. Strong capability in developing end-to-end infrastructure architectures, capacity and deployment planning, technical solution design, implementation strategies, migration planning, high-availability architecture, disaster recovery readiness, system integration, optimization, and technical troubleshooting.

Proven experience leading technical teams and delivering large-scale infrastructure projects from solution design and planning through installation, configuration, migration, testing, documentation, handover, and post-implementation support. Experienced in translating business and application requirements into scalable, resilient, secure, and highly available infrastructure solutions while coordinating with customers, vendors, database teams, application teams, networking teams, storage teams, and other stakeholders.

Also possesses intermediate to advanced working knowledge of Dell PowerEdge Rack Servers, Dell Compellent SC-Series Storage, Dell Blade Systems, HPE ProLiant DL-Series Servers, Cisco UCS Blade Infrastructure, VMware ESXi and vCenter, along with expanding cloud and cloud-native expertise in AWS architecture, Kubernetes cluster deployment and administration, and VMware Cloud Foundation (VCF). Continuously developing expertise in hybrid cloud, private cloud, container platforms, virtualization, and modern enterprise infrastructure technologies.

Combines strong technical depth with solution-oriented leadership, project implementation experience, root-cause analysis, customer engagement, technical documentation, knowledge transfer, and team development capabilities. Adept at delivering reliable enterprise infrastructure platforms designed for high availability, scalability, performance, security, and business continuity.

CORE COMPETENCIES

Strong expertise in Oracle enterprise infrastructure solution design, planning, implementation, and technical leadership, with hands-on experience across Oracle Exadata engineered systems | Oracle Private cloud (PCA) | SPARC virtualization and LDOM design | Solaris and Linux administration | Solaris and Oracle Linux OS Cluster | High availability and disaster recovery | Oracle Database Appliance (ODA) | SPARC and x86/Intel platforms | Oracle Linux KVM virtualization | ZFS Storage Appliance | Storage integration and multipathing | Capacity planning | Root cause analysis | Infrastructure upgrades and migrations | Project leadership | Strong technical team management | Customer support and SLA mitigation | Technical Documentation, Handover & Knowledge Transfer.

PROFESSIONAL EXPERIENCE

Express Systems Limited | Dhaka, Bangladesh | March 2020–Present

Manager, Oracle Post-Sales Department | Current

Previous positions: Deputy Manager, Post-Sales; Assistant Manager

- Lead the Oracle team in planning, implementing and supporting enterprise infrastructure for Government, Banking and Telco customers; coordinate delivery priorities and resolution of critical customer issues.
- Plan, design, install and implement Oracle Exadata, Oracle Private Cloud Appliance, and SPARC/LDOM solutions aligned with customer requirements and availability needs.

- Lead round-the-clock Oracle infrastructure support, including specialist SPARC and x86 system diagnostics, Exadata monitoring, and Oracle Database Appliance troubleshooting.
- Implement and support Solaris 10/11, Oracle Linux and Red Hat Enterprise Linux Environments, Solaris Cluster and Linux active-passive HA clusters, OS patching and firmware upgrades.
- Configure LDOMs, I/O domains, PCI segregation, ZFS, IPMP, storage multipathing and LUN integration; support backup, recovery, performance tuning and preventive maintenance.
- Develop team capability through hands-on training and knowledge sharing; contribute to project documentation, technical presentations and customer issue remediation.

Tech Valley Networks Limited | Senior System Engineer | August 2014–March 2020

- Implemented and administered Sun/SPARC systems, Solaris and LDOM virtualization; maintained server health, OS packages, patches, ZFS mirrors, RAID and IPMP configurations.
- Installed and configured Dell EqualLogic PS Series, Compellent SC Series and Dell EMC storage, including LUN provisioning, host integration and multipathing.

Computer Services Limited | Support Engineer | October 2010–August 2014

- Installed and supported Dell, Fujitsu and HP servers, blade systems and Dell storage; administered Windows Server and Linux, configured RAID and Linux clusters, and delivered project implementation and documentation.

SELECTED ENTERPRISE PROJECTS

NRB Bank | CBS Upgradation | April–May 2026

Designed and implemented Oracle Database Appliance (ODA X11 HA) infrastructure across DC and DR environments. Delivered complete deployment, HLD/LLD documentation, and technical knowledge transfer on Oracle ODA architecture and operations.

Grameen Phone | RAFM Infrastructure Implementation | October–December 2024

Planned, assessed, finalized, and executed Day 0 configuration for the RAFM infrastructure on Oracle Private Cloud Appliance X10. Created and configured virtual machine instances, provisioned and mapped block storage, and configured high availability across two Oracle Linux 9.5 VM instances. Configured full manual backups of VM instances to support infrastructure recovery requirements.

UCB Bank | CBS Hardware Upgrade | February–April 2024

Designed Oracle SPARC M8-2 and T8-2 solutions, planned LDOM I/O root-complex allocation, and installed and configured LDOMs. Supported DC/DR service restoration through shared storage, with backup network configuration. Restored services on new servers with minimal downtime and no reported service impact.

Jamuna Bank | CBS Hardware Upgrade | January–March 2024

Designed Oracle SPARC M8-2 and T8-2 solutions, planned LDOM I/O root-complex allocation, and installed and configured LDOMs. Supported DC/DR service restoration through shared storage and Solaris Cluster, with backup network configuration. Restored services on new servers with minimal downtime and no reported service impact.

Robi Axiata Limited | DWH Exadata Expansion | February–June 2024

Installed and deployed Oracle Exadata X9M-2 database and storage servers, including post-installation configuration and creation of a test RAC database. Completed implementation without major issues.

Robi Axiata Limited | Backup Restoration Project | June–July 2024

Installed and configured Oracle ZFS Storage appliance X9-2 with high-performance and capacity-optimized RAID profiles, Active-Active cluster configuration, and 100Gb network planning and deployment. Configured NFS file systems and mapped client services as required, with complete installation and handover documentation delivered to the customer.

Bangladesh Police | CDMS Upgradation | June–July 2024

Installed and deployed Oracle Exadata X9M-2 database and storage servers, including post-installation configuration and creation of a test RAC database for criminal application. Completed implementation without major issues.

Robi Axiata Limited | EDW and ICMS Platform Upgrade | April–June 2023

Delivered Exadata X9M-2 installation and deployment, configured database and storage servers, and created a test RAC database. Completed project requirements without major implementation issues.

Grameen Phone | DWH Storage Extended Project | April–June 2023

Installed and configured Oracle ZFS Storage appliance X9-2 with high-performance and capacity-optimized RAID profiles, Active-Active cluster configuration, and 100Gb network planning and deployment. Configured NFS file systems and mapped client services as required, with complete installation and handover documentation delivered to the customer.

UCBL Bank | CMS Hardware Upgrade | April–June 2023

Designed a SPARC T8-2 solution with LDOMs, OS cloning, I/O root-complex planning and a two-node Solaris Cluster supporting DC/DR. Configured shared storage and backup networking, and restored services on the new platform with minimal downtime and no reported service impact. Delivered end-to-end infrastructure planning, installation, configuration, validation, documentation, and implementation support to ensure a highly available, scalable, and resilient CMS environment.

IFIC Bank | CMS Hardware Upgrade | April–June 2022

Designed a SPARC T8-2 solution with LDOMs, OS cloning, I/O root-complex planning and Oracle KVM deploy on Oracle Intel X8-2 platforms for DC/DR. Configured shared storage and backup networking, and restored services on the new platform with minimal downtime and no reported service impact. Delivered end-to-end infrastructure planning, installation report, HLD and LLD documentation of LDOM virtualization infrastructure.

AIBL Bank | CMS Hardware Upgrade | June–July 2022

Designed and implemented Oracle Database Appliance (ODA X8-2) infrastructure across DC and DR environments. Delivered complete deployment, HLD/LLD documentation, and technical knowledge transfer on Oracle ODA architecture and operations.

NRB Bank | CMS Hardware Upgrade | June–July 2022

Designed and implemented Oracle Database Appliance (ODA X8-2 HA) infrastructure across DC and DR environments. Delivered complete deployment, HLD/LLD documentation, and technical knowledge transfer on Oracle ODA architecture and operations.

bKash | DWH Project | June–July 2022

Installed and deployed Oracle Exadata X9M-2 database and storage servers, including post-installation configuration and creation of a test RAC database. Completed implementation without major issues.

BBS | Census Project | July–September 2021

Installed and deployed Oracle Exadata X9M-2 database and storage servers, including post-installation configuration and creation of a test RAC database. Completed implementation without major issues.

Robi Axiata Limited | Tech Refresh Project | July–August 2021

Delivered Oracle Exadata X8M-2 hardware and software OSSI installation and deployment, including database and storage server configuration and test RAC database creation. Completed HLD/LLD documentation and RFS requirements within the customer's expected timeline, with no major implementation issues.

RJSC | Application Database | July–August 2021

Delivered Oracle Database Appliance (ODA X8-2) HA infrastructure installation and deployment across DC and DR environments, including KVM virtualization configuration on the HA platform. Completed implementation documentation and detailed technical reports as required.

NBR | ASYCUDA Project | April–May 2021

Installed and configured Oracle X8-2L servers, including RAID and network teaming for load balancing and redundancy. Delivered complete installation, configuration, and handover documentation as per customer requirements.

Bank Asia | CMS Project | February–March 2021

Installed and configured Oracle SPARC server infrastructure, including software RAID, LDOM Root Complex planning and deployment, Solaris OS configuration, and system hardening as per customer requirements. Delivered complete installation and handover documentation.

Robi Axiata Limited | ICMS Project | March–April 2018

Installed and configured Cisco rack servers and Dell Compellent SC4020 storage, including storage initialization, SAN switch zoning, LUN creation, and host integration as per customer requirements. Prepared and delivered LLD, SLD, and implementation documentation to the customer.

Robi Axiata Limited | SMS filter Project | October-September 2017

Installed and configured Dell rack servers, including RAID configuration and basic system setup, as per project requirements.

Grameen Phone | MFS project | March-April 2017

Installed and configured Oracle X5-2 and SPARC T5-2 servers, Oracle StorageTek SL150 Tape Library, and Solaris Cluster components for the MFS infrastructure environment.

Grameen Phone | ERS DR & PR Project | March-May 2017

Installed and configured Oracle SPARC T5-2 servers and implemented LDOM virtualization for the ERS infrastructure. Prepared and delivered LLD and implementation documentation to the customer.

Grameen Phone | IRIS DR & PR Project | December-December 2016

Installed and configured Oracle X8-2L servers, including RAID and network teaming for load balancing and redundancy. Delivered complete installation, configuration, and handover documentation as per customer requirements.

Banglalink Limited | ETOP-UP DR & PR Project | October-November 2016

Installed and implemented Oracle SPARC T5-2 and HPE server infrastructure, including hardware RAID configuration, firmware upgrades, and OS patching. Prepared and delivered installation documentation, HLD, and LLD to the customer.

Banglalink Limited | IVR Project | October-November 2016

Installed and implemented Oracle SPARC T5-2 and HPE server infrastructure, including hardware RAID configuration, firmware upgrades, and OS patching. Prepared and delivered installation documentation, HLD, and LLD to the customer.

Robi Axiata Limited | ODS Project | August-September 2016

Designed Oracle SPARC T5-2 solutions, planned LDOM I/O root-complex allocation, and installed and configured LDOMs. Supported DC/DR service restoration through shared storage, with backup network configuration. Restored services on new servers with minimal downtime and no reported service impact.

Brac Bank | Dell HW Project | September 2015

Installed and implemented Dell Blade Server and Dell Compellent SC4020 storage infrastructure, including hardware RAID configuration, storage LUN creation, host integration, firmware upgrades, and OS patching. Prepared and delivered installation documentation, HLD, and LLD to the customer.

BCC | Database Server Project | June-July 2015

Installed and implemented Oracle SPARC T5-2 server infrastructure, including ZFS mirror configuration, firmware upgrades, and Solaris OS patching. Prepared and delivered installation documentation, HLD, and LLD to the customer.

M&J Group | Oracle EBS Project | November-December 2014

Installed and implemented Cisco UCS Blade Server infrastructure for the Oracle EBS environment, including hardware RAID configuration, firmware upgrades, and OS patching. Prepared and delivered installation documentation, HLD, and LLD to the customer.

CERTIFICATIONS AND TRAINING

Certifications: Red Hat Certified System Administrator (RHCSA) and Red Hat Certified Engineer (RHCE), Oracle Database Administration 2019; Oracle Database 12c: RAC and Grid Infrastructure Administrator; Oracle ACS Exadata certification.

Oracle training and assessments: Private Cloud Appliance; T7 Troubleshooting and Installation; Sun SPARC Enterprise M3000 Server Administration; Application Development Cloud Platform Solution Engineering Specialist; Exadata On-Premise 2020 Solutions Engineer Specialist Assessment.

Additional training: RHCSA and RHCE at IBCS-Primax; Dell SC Series Install and Configure Training, Singapore; Dell PowerEdge Blade Server Solutions; Oracle Solaris 11 Administrator Training, online; Oracle Solaris LDOM Training; ESL.

Cloud and platform development: AWS Cloud AACS course. Current self-study: VMware Cloud Foundation, Kubernetes clusters, Red Hat OpenShift and cloud-native virtualization.

EDUCATION

Bachelor of Science in Computer Science and Engineering | Prime University, Dhaka | 2009–2013

ACHIEVEMENTS AND AWARDS

Successfully completed 30+ large-scale enterprise infrastructure projects, strengthened security across 60+ systems, and attained 15+ Oracle server and services certifications. Received a Certificate of Appreciation and was recognized as Best Performer of the Year (2022–2023) for outstanding performance and successful project delivery. Also received the Rising Star Award (2024–2025) in recognition of significant contributions to major Telecom and Mobile Financial Services infrastructure projects.

TECHNOLOGIES AND LANGUAGES

Oracle Exadata X9M-2, ODA, PCA; SPARC M8-2, T8-2, T8-4, T7-1, T5-4 and M12; Solaris 10/11, Oracle Linux, RHEL, Windows Server; LDOM, KVM; Solaris Cluster, Linux HA, ZFS, SVM, IPMP, NFS, RAID; Dell EqualLogic, Compellent and Dell EMC storage; Cisco UCS.

Languages: Bengali (native), English (proficient).
